DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of copending Application No. 10/621,521 in view of Higuchi et al (JP 2000-070409). Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application and the '521 application claim golf ball comprising a core, an intermediate layer made comprising a composition with a functional group modified resin as a main component and a cover comprising a resin having a polar site that can react with the functional group of the modified resin in the intermediate layer. The present invention further claims the intermediate layer is harder than the cover layer while the '521 application claims the intermediate layer is softer than the cover layer. Higuchi teaches a golf ball comprising a core, an intermediate layer, and a cover

wherein the intermediate layer is softer than the cover layer. One skilled in the art would have modified the instant application with Higuchi to achieve the desired performance characteristics.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
